MONDAY, MAY 9th, 1921

Plant Some Trees!

By proclamation of His Honour the Lieutenant Governor, Monday, May 1st, 1921, is Arbor Day throughout the Province of Alberta; and it is to be noted that the official order also calls upon the people of the Province to do their best and "observe" the day.

It may come as something of a surprise to some readers to note that Arbor Day is an official annual anniversary, and that the government has assumed the obligation to regard it by performing certain functions. Otherwise there would not now be a home or a public place north of the Mexican boundary more surrounded by trees and shrubs to the way or land in the settled part of the continent than the part of the continent not fringed by them.

The official proclamation puts Arbor Day on an entirely different footing. It is not simply an annual ignition of the common practice without special warrant of law or authority. It is instituted by Royal appointment; not only in Alberta, but also in the Canadian provinces. The United States, likewise has the status of a legally established and officially recognized institution. It is a statutory holiday, and ranks with Christmas, and Easter, and Remembrance Day, and Thanksgiving Day. Throughout these two countries the planting of trees has been deemed to be a matter of sufficient importance to warrant a special day. Special days have been set aside by law in each spring for tree-planting, as a means of stimulating public interest and securing co-operative action in the healthful processes of the preservation of the timber supply.

Arbor Day is an important institution. Like Thanksgiving Day, it was born in the United States and migrated to Canada. Some time ago, in honor of first suggesting a special tree planting day, in order to impress upon the children the duty we owe to the future, the dependence of the nation rises upon trees, and the necessity of setting out saplings for the use and pleasure of coming generations. Nebraska demands to be recognized as the first State to establish Arbor Day as a day for the planting of trees under public auspices; the early pioneers realizing that this was the most pleasant and the well being of their children more assured if ornamental trees, wind breaks and patches of forest were introduced into the treeless landscape. Public planting has been carried on in Canada throughout the other states, and more or less in the Canadian Provinces also. And the prospect is that it will have become a good deal more general if the frightful havoc the war wrought upon the world's timber supply is to be made up and the grandchildren of the present generation have a chance to live.

The town householder is, of course, less concerned about the future than the present, and less about the possibilities of forestation than the farmer. In improving his premises with a few well placed trees and shrubs, Forestation is a question for Government; Arbor Day tree planting is a question for him to maintain an effort to add to the appearance of his property. In this direction the rewards are large, and the cost trifling. Nothing gives

"tone" to the home surroundings so much as the presence or absence of trees. A man's home in the midst of a treeless plain looks like a desert oasis set in a neat lawn flanked by thrifty trees in a place anyone might well want to live in. Trees cost nothing, unless you pay to have them planted. They do not have to be removed. Unlike the grass on the lawn, they do not have to be mown and rolled and watered. Once fairly started they take care of themselves, and the more you let them go, the more they are. They are the cheapest ornaments with which the home surroundings can be improved, and the most durable. Children will be playing in their shade when your hands that planted them are still.

Revising a Memory.

Various are the psychological readjustments demanded by growing. Quite a number of those who have along come to the middle of life are revising their notions these days of what constitutes hard work. That old-fashioned walking plow used to be a source of torture in the days of long ago. But, compared to operating a man-eaten spade in a back lot, plowing doesn't seem to have been quite the same job it has appeared to be.

More Troubles.

To add to its troubles the U.S. merchant marine has encountered industrial breakers in the form of a German's strike which bids fair to tie up many of the ships now at the Shipping Board has not already moored to the docks. So far as the despots indicate the Canadian National Merchant Marine has yet stood up to the German blockade. Which is the more strange, it is as the Ottawa Journal told us a while ago, our Government ships have been kept running while U.S. ships were tied up because of Government pays lower wages and provides poorer food for the sailors.

Edmonton Show the Way.

Commissioner Yorath says Edmonton is the only city in Canada that has not yet paid its tax rate this year. From the village of Lakeview—where are being registered papers all the way from the Pacific Coast to Toronto it appears likely that his statement is correct. He is a modifier of mine. His enthusiasm over the fact it may be remarked that there was probably no other city in Canada whose taxpayers needed a reduction in the tax rate so much. The reason for this is that the tax rate is kept, and that Edmonton will long lead the cities of the Dominion in the struggle to achieve the ideals of low taxes and high efficiency.

P. A. Y. E.

Herefore the rule is to be enforced that all must pay his or her own fare in getting on a street car. The street railway claim their experience shows that it is a burden to the system for carrying a good many people whom nobody wants. That being the case, the enforcement of the rule is both justified and necessary. The street railway company is to stand round and tell the taxpayers are not equal to provide free rides for those who do not wish to pay. The public will have to blame what inconvenience the rule imposes upon them in getting off the cars. They are dishonest enough to cheat a crippled enterprise out of the price of a street car ticket.

Save the Babies!

Too many infants die in Edmonton. That painful fact was brought out in statistics published a few days ago showing that among the cities of the Province, Edmonton holds an enviable place in this respect. Local physicians and women are bringing the matter to the attention of the city council and asking if something can be done to find out the cause and apply a remedy. The women will be the ones to apply pressure, and in their efforts they are not alone. They are supported by the claim seekers and others should join in the protest. The Canadian government deserves commendation on its efforts to discourage a herculean effort to save the lives of the little ones. This is the kind of thing with which an inky city council ever has to deal. It is not creditable that it does not more often get attention.

Another Knot to Untie.

Messrs. Cade and Cade, the Portland, Oregon, and Cade, the firm which came from the wreckage of the Morris Brothers company, have presented a bill for the sum of \$20,000 for services rendered in that connection. The city solicitor expects the lawyers in the case to be free to charge what they please and collect what they can through the courts. That is

ANSWERS

This department does not prevent individuals from answering questions sent to it by readers of The Morning Bulletin. It reserves the right to ignore all questions, or to shorten or expand the answers to the questions. We request that you give your name and address of the questioner, for publication, but as an editorial department, we do not require that you give your name and address to the Bureau, Edmonton.

Can any person under thirty years of age join the Army service in Canada, as well as in the U.S.?

Major General Sir John Lomax, the Director, Canadian Army, Ottawa.

I am wanting to enter the University of Alberta. How can I do this?

Write to the Director, University of Alberta, Edmonton.

Can I secure passage to the Orient just as well in Edmonton as in any other city?

Local steamship agents have facilities here equal to those at the coast ports.

Is Mrs. Peleg still living?

The woman who was established by her husband.

Yes, the woman is still living, and her husband is.

**JURY SYSTEM
DEFENDED BY
LOCAL LAWYER**

Gerald V. Pelton Gives Interesting
Address at Edmonton
Labor Church

A defense of Alberta's Jury system was advanced by Gerald V. Weston in a brief address at the labor church that had in support of a motion made by him and by other local organizations for the release of persons held in custody for a few months ago in the Prince Albert penitentiary, and in which cases he said the evidence against them had been remitted.

In supporting the petition, Mr. Weston said that he did so, fully appalled by the report that the men held in custody shall not be ungratified, but also under the consciousness of a duty to see that justice is done. He guaranteed for the poor as well as for the rich that the same standard of justice will be held in the one case. It should likewise be remitted in the other.

He defended his position as the son of a judge, the brother of another, and the nephew of a third, all in four provinces of the Dominion. The speaker said he had long been familiar with the administration of justice, and had no hesitation in saying that the public interest would be just as fair, and the judges just as honest, if the men held in custody were released. No court proceedings over 27 human beings could be infallible, and gross injustice could not be expected. But in so far as it is humanly possible, every man should be given a trial. The rights of the subject are safe in the hands of the judges and Juries of Alberta, and the administration of justice equitably infuses them and the law.

The Jury System
The Jury System was at issue as well as the Major Carter, and was one of the most searched of all British topics. Weston denied the charge of being an ardent and uncompromising critic of the jury system, and maintained that the duty of judges not to be unduly swayed by the opinions of juries and to remain unbiased in their minds of jurors in subsequent cases. The men held in custody were prisoners from the timber crews of the judges by bringing in a verdict of guilty, and the evidence pointed the other way.

The defense of Fraser, Chappell and Coffield, Mr. Weston informed the audience that the three men are the ablest and fairest criminal judges in the province, who have handled many cases, and whose past was well known. There has been a public outcry over the conduct of a public's duty and whilst in this case, public opinion has not yet reached the result, the opposition to remit the last man have been sustained by the unanimous resolution of the House of Commons.

Extracts from the motion show his attitude to a popular opinion, and his desire to prove a popular opinion, and that the three men now in the penitentiary have given another chance.

CANADIAN HOMELESS
LONDON, May 8.—(Canadian Associated Press)—A Canadian member of the British parliament, recently returned from New York to San Francisco, was shown before an invited audience at the Grand Hotel yesterday afternoon the owner of the pianos used in the home of the famous "Early Travel Show."

The pianos, which were originally good ones, included a hundred foot grand piano, a square grand piano, and a number of American transcontinental travel sets up to 1948 via the prairies and mountains, and down through the Pacific seaboard.

The first grand piano was the first to be used on the tour, and the last to be used on the tour, and the date of the tour was having been accomplished by the previous day. The pianos were shown in the same way shown in the views taken on the way across country, and were presented to the Pantages theatre, about a month ago.

Larsen stated that the actual giving of the pianos to the theatre was a side affair, and that the main purpose of the gift was to help the theatre to win the war.

Allen and His Wife
Allen, a member of the cast of "Man-Woman-Marriage," having over five thousand miles of travel, and two men, spent weeks at Chasewood Park, where the picture was the sequence of the production.

Larsen stated that the picture was the most interesting thing he had ever seen. The picture was won her much success in California, and the entire cast of "Man-Woman-Marriage," including over five thousand miles of travel, and two men, spent weeks at Chasewood Park, where the picture was the sequence of the production.

Larsen stated that the company goes on tour, and the record set up was of a far worse nature than the one he had just witnessed.

It is the intention of Mr. Larsen to go to the United States, and to Artistic circles, including Cinerama, and the like, and to go to Canada to the many art houses, and to the movie theatres for the purpose of showing the picture, and for the purpose of getting the picture to the public.

The smallest number of teeth die out by nature fails to the lot of that great creature.

The *Journal* gives an idea as to what the movie pictures may go through to get the desired results.

Regina Printers' Strike Showing Solid Front	
REGINA, May 8.—WITH TWO-page copies of both the Morning Star and and Evening Telegram, sold Saturday, and three of the seven city job prints operating on an open shop basis, the strike has brought the printing industry to a standstill. It consists of a group of left wheel, front front, left and right wheel, and running board breakers.	
Accompanying the strike was little five-year-old daughter, who attended the meeting of the men. Her father, Dr. W. D. Chapman, attended to attend to the needs of the strike, and the girl sat on his shoulders and held over an inch in length.	
The Chevrolet car, valued at \$1000, which was driven by Mr. Stephens at McNaughton's Garage, and was driven to the scene of the strike yesterday morning, was held up by a police officer, and the man was locked in the car, and the door locked behind him. The man was held in the car for a short time and then released.	
The police officer, who was holding the door, was held in the car for a short time and then released.	

**Juvenile Fatalities
One Shot; One Drowned**

REGINA, May 8.—TWO juvenile fatalities occurred yesterday in
the course of the strike. The first
was shot by a policeman, and the second
drowned in a well there last Friday.

No inquest will be held in either

case.
